DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 1153f (Figure 22). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 5 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Dinsdale (US 4,843,945).

Regarding claim 5: Dinsdale discloses an apparatus for manipulating wellbore tubulars having a collar. The apparatus includes the following features:

- A circular body **108,109** having a top and a central cavity (Figure 12) around the axis of the body. The cavity has a diameter that would allow the collar of the tubing to pass therethrough.
- A plurality of petal plates **136,137** having radially inner and outer portions. The plates are horizontally supported on and spaced apart from the top of the body (Figure 12).

Art Unit: 3672

- One or more actuators **143,144,145,148** operatively associated with the plates. The one or more actuators move each plate in a radially inward direction over the body and into the cavity; the radially inward movement is normal to the body axis. The movement of the plates into the cavity prevents the passage of the collar of the tubing to thus hold the tubing within the apparatus.
- During the movement of the plates, the body acts as a fulcrum **153,154** for the plates and a counterforce member **124** opposes the leverage imparted on the body.

Regarding claim 9: The one or more actuators are adapted to retract the plates radially out of the cavity so that the collar of the tubing can pass through the cavity.

Regarding claims 10 and 11: The one or more actuator is a cam **144,145,148** and the petal plate is a cam follower where the cam is received in an aperture (Figure 13) in the petal plate between the inner and outer portions of the plate.

Allowable Subject Matter

4. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. In view of applicant's amendment, the objections to the drawings, except that indicated above, have been withdrawn.
6. Due to the related, co-pending applications being allowed to go abandon, the double patenting rejection has been withdrawn.
7. Applicant's arguments with respect to claims 5-11 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3672

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
